

Programme Overview

[The International Research Opportunities Programme \(IROP\)](#) is an exchange programme which takes place over ~8 weeks in the summer from 1st July – 23rd August 2024. Selected undergraduate students work on a research project under the supervision of researchers at [Imperial College London](#). Participants will share the experience with students from other institutions and have the opportunity to explore London and the United Kingdom during the summer. Participants will gain practical research experience in an area of interest whilst experiencing student life at Imperial.

Research project

Participants will be matched with a host supervisor at Imperial College London according to interest areas. It is not guaranteed to be matched with a particular supervisor and participants may need to be flexible. Once matched, the research project is planned and carried out independently between the student and supervisor.

Projects will take place on Imperial's [South Kensington](#) or [White City campus](#) depending on the research project and host supervisor. The Department of Chemistry is mainly based at White City campus.

Intercultural experience

Students from MIT, the Technical University of Munich, Tokyo Institute of Technology, Cornell University and the University of Toronto will participate in IROP next summer. There will be a social programme, including a welcome afternoon tea, local trip and celebration event, where participants can get to know fellow IROP students and explore London.

Programme dates

Monday 1st July 2024: IROP begins. Orientation session with the IROP Team, followed by lab induction in the department

During IROP: Organised events as part of the social programme

23rd August 2023: IROP ends

Variation to these dates will not be possible.

Further information

[Register to attend](#) the **IROP Information Session** on Wednesday **8th November 2023 at 14:00 – 14:45 GMT** to learn more about this opportunity.

Watch MIT student Claire's [IROP day in the life](#) vlog.

Eligibility

- Be fully enrolled as a student at TUM during IROP
- Have completed at least 2 years of studies before beginning IROP in July 2024 (we find that IROP participants get the most out of the experience if they have completed 2-3 years of their studies)
- Be able to commit to the full duration of the programme 1st July – 23rd August
- Good study progress and min. good grades

Application Process

There are two stages to the application process:

1. **Selection by TUM CIT Informatics: Tuesday, January 23, 2024 13:00h CET**
2. **If selected, the Imperial IROP Team will request application documents for project matching**

The application documents include:

- Statement of motivation (research areas/labs of interest, motivation to take part in IROP)
- CV and academic transcript
- 3 supervisors of interest who you would like to work with on a research project. Supervisors of interest must be from the Imperial department you have been nominated to. An academic's online biography page will state if they are based at South Kensington or White City Campus. **Please do not contact any academics.**

This information will be used to match selected students to a suitable host supervisor for a research project. Information about current research areas and potential supervisors can be found under the 'Research' tab on the host departments webpage. Follow to link in the table on page 1 for the host department which applies to you. Please note, if you are selected for IROP it is not guaranteed that you will be matched with a chosen supervisor.

Whilst Imperial College London will make every effort, final acceptance to IROP will depend on a suitable supervisor and research project being agreed.

Practical Matters

Accommodation

Accommodation will be arranged for all participants in student halls of residence. Selected participants will be given further information to book and pay for their room. Participants should expect to commute to either the South Kensington or White City Campus each day – a typical London experience!

Suggested Budget

Guide only: actual costs will depend on personal preferences and updated costs in 2024.

	GBP– weekly	GBP – total 8 weeks
Return travel to London	-	Varies
Standard Visitor Visa (if applicable)	-	£100
Single en-suite room in Imperial hall of residence *based on 2023 costs **estimate Room rents are subject to change each year and vary depending on room type.	£284 *standard stay rate (5 –9 weeks)	£2,272
Food *estimate	£71	£568
Local travel (zone 1-2 travelcard , all buses for 2 months)	-	£312.60
Personal and leisure *estimate	£60	£480

Covid 19

Potential impact will be continuously monitored, and adjustments to overseas opportunities may be required at short notice. IROP will follow any UK and international travel advice and restrictions.

Communication

Once nominated and selected by TUM CIT Informatics, participants are then supported by Beth & Laura, the IROP Team at Imperial, who are available to answer questions and provide support during IROP.

IROP Tips

Ideal participants will be willing to develop skills in proactivity, organisation and independence, which will support you well in preparing to come to London and make the most of the research project.

Tip from previous participant: 'To get the most out of the placement requires resilience, adaptability and an open mind as it is probable that things will go wrong or will not be as you had expected. Despite this, I enjoyed every moment of the trip and could not imagine a better way to spend the summer.'
