Let's talk about:

Application project@in.tum

- **Special features**
- **Differences to IDP**

Main target group:
first year Master of Data Engineering and Analytics students

Application Project [IN2328] (1)

- Part of catalog B1.2 of the Master *"Data Engineering and Analytics"*

- Similar to an IDP, but has small differences:
  - Only project, *no lecture* -> 10 ECTS
  - Registration **only** during **the first week of lectures** of each semester
  - Duration up to 2 semesters
  - Teams possible (but not recommended)

- Requirements project topic
  - Domain outside classical computer science, e.g., medical science, biology, information systems, …
  - **Topic** must be related to the **processing of large data sets**

Application Project [IN2328] (2)

- Project may be done in cooperation with
    - A department of university
    - Another university or research facility
    - A company (start-up)
    - ➢ In each case supervisor must be a professor of TUM and the topic must be from the teaching or research domain of the supervisor

- How to find an Application Project?
    - See IDP, additionally you can:
        - Contact people writing out IDP topics, they are often also suited for an application project
        - TUM Data Innovation Lab

- Website
    - https://www.in.tum.de/en/current-students/masters-programs/data-engineering-and-analytics/application-project/
